

ILS300 INLINE STRAINER

The ILS300 is a lightweight bidirectional aluminium in-line strainer typically installed in mobile pumping systems to protect downstream equipment from debris and foreign objects.

Features and Benefits

- Protects downstream equipment such as meters and pumps from debris and foreign objects.
- Stainless steel strainer basket is bidirectional.
- Drain boss located on lid.
- Easy to maintain. No tools required, just remove two eye bolts to remove the inside filter for cleaning.
- Strainer basket design ensures all liquid has to pass through the strainer and no debris or foreign objects can pass through.
- Aluminum strainer flange provides increased strength and durability.

ILS300

Technical Information

Maximum Working Pressure	600kPa (check with Liquip for higher pressure requirements)
Weight	4 kg
Mounting / Installation	3" TTMA Flanges. Bidirectional
Gaskets (Strainer Basket)	Viton
Working Temperature	-20°C to 50°C
Mesh Specifications	490 micron (standard)
Materials	Aluminium body & lid, Stainless Steel mesh with aluminum flange, Viton seal.

Ordering Information

Item	Description
ILS300	Aluminium In-Line Strainer 3" TTMA flange both end with quick release lid for easy cleaning.
ILS300Z	ILS300 complete with 0656 NBR Cork gaskets.
ILS300VZ	ILS300 complete with 0656V Viton™ gaskets.

Associated Equipment

Item	Description
ILS300-3-490	Strainer Basket S/S to suit ILS300 - 490 micron.
ILS300-3-1000	Strainer Basket S/S to suit ILS300 - 1000 micron.
0656	3" TTMA NBR Cork Gasket.
0656V	3" TTMA Viton™ Gasket.
LBV300	3" Butterfly valve with bonded Viton™ seal.
LBV300Z	LBV300 complete with 2 x 3" TTMA NBR gaskets.
LBV300VZ	LBV300 complete with 2 x 3" TTMA Viton™gaskets.
LBV350VG	3" Butterfly valve with bonded Viton™ GFLT seal.
BF3	3" TTMA Aluminium Flange.
BF3-SG	3" TTMA x 25mm thick.
